 Portfolio: bepf.netlify.app

Professional Summary

Full Stack Developer specialized in Java, Spring Boot and React, with experience building web and desktop applications. Experienced in REST APIs, JWT authentication, PostgreSQL, SQLite, ElectronJS and third-party integrations such as Mercado Pago. Passionate about designing scalable software products, from backend architecture to modern user experiences, always focusing on clean code and maintainable solutions.

Featured Projects

WoWelbe

- React + Vite + Spring Boot
- SRP6 authentication compatible with AzerothCore
- Mercado Pago integration and webhooks
- Premium shop, character management and REST APIs
- MySQL

TechBeStore

- ElectronJS + React + Vite
- SQLite local database
- Customizable desktop ERP for small businesses.
- Licensing system
- Product, inventory and sales management

Los Reyunos Reservation System

Production reservation system developed during the professional internship at Universidad Tecnológica Nacional. Developed REST APIs, JWT authentication, layered architecture and PostgreSQL database.

Professional Experience

Backend Developer – UTN Los Reyunos Reservation System (2024)

- REST API development with Spring Boot
- JWT authentication and access control
- PostgreSQL database design and management
- MVC and layered architecture

Education

University Technical Degree in Programming
Universidad Tecnológica Nacional (2022–2025)

Technical Skills

Backend: Java, Spring Boot, REST APIs, JWT

Frontend: React, Vite, TailwindCSS

Desktop: ElectronJS

Databases: PostgreSQL, MySQL, SQLite, MongoDB

Languages: JavaScript, Python, C++

Tools: Git, GitHub, Postman, Netlify, VS Code, IntelliJ

Authentication: SRP6, JWT

Payments: Mercado Pago
